MILESIGHT BOOSTS SECURITY AT MANUFACTURING BASES

Overview

Milesight network cameras and NVRs were employed in the manufacture bases in the Istanbul, Turkey. Milesight Starlight Premium Series and Mini PoE PTZ Bullet camera efficiently protect the bases.

Background

Three large enterprises were looking for robust and trustworthy products to protect their manufacturing bases and Milesight's products earned their trust. PAS Group is a manufacturer of cable&panel systems for household appliances, and covers 4,300 square meters facility area. VETAS, A plastic package manufacturer with over 5,000 square meters manufacturing base, and Eaton, a company who provides energy-efficient solutions and employs approximately 96,000 employees, are seeking more reliable surveillance systems for manufacturing bases among numerous monitoring productions. Milesight products with superior quality beat competitors.

Solution

The manufacturing bases needed surveillance systems that is capable of being 24-hour guardian who precisely record every images of people, cars, even animals, etc. And turn as a night watch to safeguard the factory and discourage criminal behaviors. Also, the system need to be tough enough to prevent potential damage.

High Resistance

The metallic body of bullet cameras and the polycarbonate cover of dome cameras ensure that they are capable of resisting some damages and the IK10-rated vandal-proof housing of cameras are rugged enough to withstand continuous vibrate, which guarantee a long life-span in working on the wall of factories. The IP67-rated weather-proof housing prevents the intrusion of particulates produced by complicated environment of industries and ensures cameras to be qualified in monitoring in different environments inside the factories.

Neat Design

Milesight cameras own the neat and installation-friendly cable management. For example, the integrated junction box of Mini PoE PTZ Bullet Network Camera minimizes the installation troubles and enlarges the space for cables, which ensures the flexible installation. The neat design of Milesight network camera fits for the clean and concrete building of manufacturing bases.

Starlight View Capability

The adopted cameras are all capable of offering starlight view. The starlight cameras are able to deliver high detailed color images reaching 0.002Lux (Color) or 0Lux (B/W) in low light environment. The Smart IR II technology that equipped in Pro Bullet Network Cameras and in Mini PoE PTZ Bullet Network Cameras provide viewing rang of up to 60m (100m) for Pro Bullet Network Camera and 100m for Mini PTZ Bullet Network Camera. The high beam and low beam works together to guarantee a better image clarity of objects in various specific viewing angles. As a result, the network cameras record every details day and night to safeguard the bases.

Result

Milesight Network Camera is now working in the manufacturing base of PAS Group, VETAS company and Eaton company. The Remote Focus&Zoom Pro Bullet Network Cameras, Mini Bullet Network Cameras and the Vandal-proof Mini Dome Network Cameras provide high detailed image so that no detail is missing indoor and outdoor. Furthermore, the Mini PoE PTZ Bullet Network Camera offers all-round monitoring to cover the entrance area. As a result, Milesight boosts the security at these manufacturing bases.
